

This is a project update for the Cowles Street Project.

Beginning Saturday (should be completed by evening):

- Work will move into the eastbound lane on 19th Ave at the Cowles St intersection
- Eastbound traffic (headed towards South Cushman) will be shifted into the turn lanes in the immediate area of work
- Westbound traffic will remain in its normal lane, but drivers should be cautious

Beginning next week:

- Storm drain installation should be complete
- Curb and gutter installation should begin mid-week, starting on 21st Ave then to Cowles St
- 21st Ave will remain accessible to residential traffic during this time, please be cautious as equipment and workers will be in the road area

Continuing next week:

- Cowles, 23rd to 19th Ave, will be closed to through traffic
- Residential and business access will be provided during this time
- Detours will be set up during this period, directing traffic around the closed area

Travelers should use extra caution and be alert when in and around the construction zone

- Detours and traffic patterns change
- Watch for pedestrians, especially children during summer recess
- 21st Ave is unpaved so speeds should be kept down for safety

Please visit the Cowles Street Project [website](#) and refer your clientele for more information.

If you have any ADA concerns please contact Exclusive Paving or DOT&PF.
